# about kotra

KOTRA, initially the Korea Trade Promotion Corporation, was established in 1962 as a national trade promotion organization. Since then, it has successfully facilitated Korea's rapid export-led economic development through various trade promotion activities such as overseas market surveys and business matchmaking.

In August 1995, cross-border investment promotion and support for technological and industrial cooperation projects was added to KOTRA's mandate, and it was renamed the Korea Trade-Investment Promotion Agency(KOTRA).

KOTRA currently operates Invest KOREA, the national investment promotion agency. Originally initiated as the Korea Investment Service Center(KISC) in 1998, the agency was relaunched as Invest KOREA in November 2003 to support foreign investors by offering more powerful incentives and an expanded range of services.

KOTRA is now well-equipped to pursue its twin mandates of trade and investment promotion to enhance national prosperity and competitiveness, with the ultimate goal of positioning Korea as the business and economic hub of Northeast Asia. With its long-term experience and expertise, KOTRA serves and assists all interested parties worldwide to do business with Korea.

In order to execute its mandates more efficiently, KOTRA has opened an extensive worldwide network of overseas Korea Business Centers. As of 2019, 129 Korea Business Centers are operating in 84 countries.

And to take maximum advantage of the era of E-Commerce, KOTRA launched the interactive Internet portal sites of INVEST KOREA Online in 2003 and BuyKorea in 2004, respectively.

KOTRA Academy was launched in 2003 as a professional learning center for international business. In the long run, KOTRA's well-trained trade and investment manpower, armed with relevant theoretical and practical knowledge, will bolster the nation's trade and investment infrastructure.

## At a Glance

| | |
|---|---|
| Business type | PE piping system manufacturer |
| Established Year | May, 1987 |
| Employee Number | 92 |
| R&D Employee | 5 |
| Annual Sales | Over 22 million dollars |
| Export Amount | Over 5 million dollars |
| Certifications | CE, ISO 9001, ISO 14001, KS, NSF, TUV, Etc. |

## Major Customers

PE installation, distribution, gas & water companies, and PE plumbing designer, and engineering technician.

## Strengths

- Cosmo I&D is only one company which provide total polyethylene piping systems from product production to after service in South Korea.
- Cosmo I&D has company's own technical skills through developing products steadily and we are protecting these technologies by patent.
- Cosmo I&D has sold our products abroad over the 10 years. These experience help us for quick response to satisfy customer's needs such regarding product problem solving and maintenance.
- Cosmo I&D has kind of over 400 products regarding water & gas.

## Products

Cosmo I&D has kind of over 400 products regarding water & gas such as Polyethylene pipes, spigot, electrofusion fittings, fabricated fittings, ball valves for gas and water, and installation tool.

## Main Item1

The PE Ball Valve of Cosmo I&D is the optimum ball valve that maximizes the advantages except for the disadvantages of conventional valves.

- Easy to control Open/Close through improving rotation torque.
- Chronic problem-slove through the development of inside ball and ball seat
- Guarantee of best convenience and safety to customer

## Main Item2

PE Electrofusion Fittings of COSMO I&D is made in compliance with international standards. Base on enough experience in PE manufacturing and long-term export, I am sure that we can provide the best quality product not only domestic to but also all over the world.

- Strong durability to maintain shape and function for a long period.
- Easy and simple to fusion and installation.

## Main Item3

PE Spigot Fittings of Cosmo I&D is made in compliance with international standards. PE spigot fittings also have strong durability and easy and simple to fusion and installation. We can provide a variety of products that can be applied to the long-term market.

## To whom to supply

PVC Flooring Tile Distributor

## Strengths

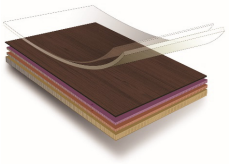
1. High Density PU Coating
2. Various Color / Pattern Design Collection
3. Glass Fiber Sheet in Products
4. Recycled Material
5. No nned of Glue Installation (Loose Lay, Click, Acoustic)

## Main Item1

LVT Dry back - Installed with Glue

Feature : Floor coverings, whether or not self-adhesive, in rolls or in the form of tiles, and wall or ceiling coverings "in rolls with a width of >= 45 cm, consisting of a layer of plastic fixed permanently on a backing of any material other than paper, the face side of which is grained, embossed, coloured, design-printed or otherwise decorated", of polymers of vinyl chloride.

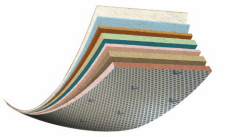
## Main Item1



Funtion

- Eco-friendly LVT flooring is composed mainly of Wear Layer and PVC (DOP free based.)
  - NO TOXIC, NO FORMALDEHYDE, NO HEAVY METALS, NO PLASTICIZERS, DIOXINS
- PVC-free (plasticizer-free, dioxin-free)
- Recycling (reduction of emissions)
- Heavy metals-free
- Formaldehyde / Toluene-free
- VOCs-free
- Excellent abrasion-resistance
- Excellent dimensional stability

## Main Item2



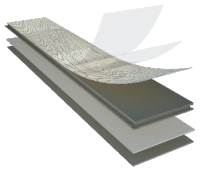
LVT Loose lay w/ NS pad - Installed with out any glue

Feature : Experience beautiful ECORIA
Loose Lay Tile with convenience of installation.
Fully Recyclable Loose Lay Tile shows DAEJIN's values which cares about the environment.

Funtion

- With glass fiber layer
- With anti slip backing
- Environment-friendly vinyl floor tiles ( No need of adhesives )
- Easy installation
- The supreme durability
- Fully recyclable

## Main Item3



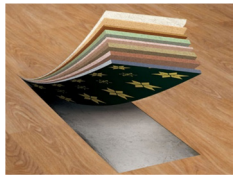
LVT Click system - installed with edge click system

Feature : Glueless luxury vinyl plank featuring patented click technology.

Funtion

- DAEJIN's own sourcing developed new click system
- Easier joining for clicking (designed the groove by advanced profiling) rigid strength after joining in short edge part
- 3 various sizes (175mm x 935mm, 169mm x 1210mm, 175mm x 935mm, 219.6mm x 1210mm)VOCs-free

## Main Item3



Ecoria LVT Acoustics

Feature : Sounds can be stressful in our environment, ECORIA Acoustic is the key when it comes to reduce the noise between the stories in any residential places.

Funtion

- Excellent dimensional stability using glass fiber layer
- Cost effective(No glue down) way to improve the residential environment
- Excellent noise reduction
- Fully recyclable environment-friendly vinyl floor tile
- Excellent ability to absorb noise

## Strengths

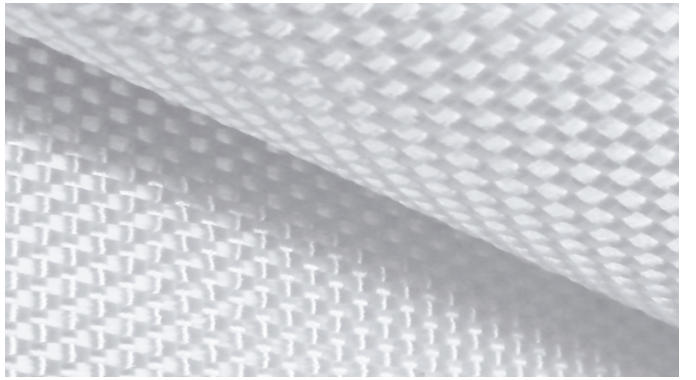
GEONIA is one of the leading manufacturers also an exporter of high strength woven geotextile In Korea.
We design and produce customized geotextile, Made of polyester and polypropylenes yarns.
GEONIA has concentrated on manufacturing polyester & polypropylene woven geotextiles for separation and reinforcement of soil ground and for retaining ground stabilization.

## Products

### Polyester Woven Geotextile



- Production Capacity : 10,000,000 m2 / Year
- Product Range : Uniaxial : 100~1,000 kN/m
  Biaxial : 50~500 kN/m
- Material : High tenacity Polyester
- Applications
  - Uniaxial : Retaining Wall, Road, Railway, Embankment
  - Biaxial : Soft Soil Ground, Road, Harbor, Industrial Area
- Functions
  Separation, Erosion Control, Reinforcement, Confinement

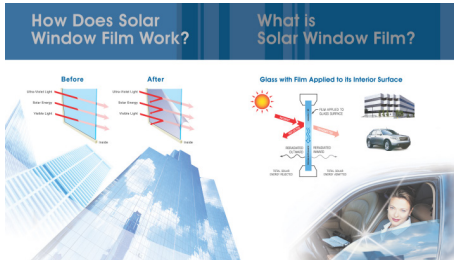
1. USA 2. Indonesia 3. Thailand 4. China 5. Malaysia 6. Brazil

## Strengths

- Depend on advanced management and manufactor systems with many experience employee, keep Higher & Stable quality and marketing. Offering buyers products at more competitive prices. Protect whole makrket share by stable and high level marketing power.
- Attached Solar window films to glass of Automotive and Building, which protect people against IR-Ray, UV-Ray, sun-light.

## Products

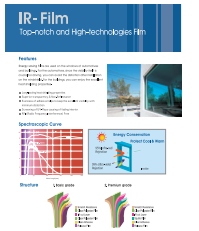
solar tinted window films



## Main Item1

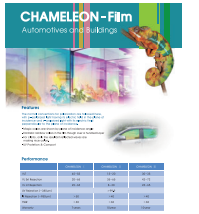
- Clear and colored safety films are uesed for automotives and commercial & residence. Stronglaminating adhesive helps protect the personnel and property from shattered glass.
- against injury from shattered glassby holding them or from the dangerous flying glass from the outside.
- fine optical transparency
- size : 60inch x 30M/roll

## Main Item2



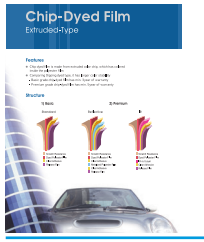
IR films and IR Pigment films are energy saving Films are used on the glass of automotives and building.
For the automotives, since the visibility itself is crucial for driving, you can avoid the distortion after installation on the windshield.
For the buildings, you can enjoy the excellent heat shielding properties.
-long-lasting heat shieding properties
-superior transparency & non-reflectance
-evenness of adhesive helps to keep the excellent visibility with minimum distortion
-RFI(Radio Frequency Interference) free
-size : 60inch x 30M/roll

## Main Item3



The normal conventions for polarization are followed here, with p-polarized light having its electric field in the plane of incidence and s-polarized light with its electric field perpendicular to the plane of incidence.
-Magic colors are shown by plane of incidence angle
-Fantsatic rainbow colors in the film though over a hundred Layer
-For clarity, only the resultant reflected waves are making nice colors.
-UV Protetion & Comport
-size : 52inch x 30M/roll

## Main Item4



Chip-dyed film is made from extruded color chip, which has colored inside the polyester film comparing other type films, it has longer color stability.
- UV-Ray protection & comport
- sun-light protection
- size : 60inch x 30M/roll

## Company introduction

Flexdrop is the industry's most experienced manufacturer of innovative fir efighting and fire protection equipment for 35 years. In close partnership with industry professionals, we are continuously seeking out innovative ways to ensure our products offer the most efficient, reliable and high-performing solutions available to residential and commercial structures around the globe. Through technological innovation, attention-to-detail, and stringent quality c ontrol, we deliver superior products. We emphasize in high-quality manufac turing products and understand the importance of affordability to our custo mers.

## Main Item1

### Sprinkler Flexible hose

[YONGWON(R. Korea) - Sprinkler Flexible fittings / UL, FM, LPCB & VdS]

Flex Drop is a unique stainless steel flexible hose assembly fittings. Flex Drop replaces the conventional method of fitting off sprinkler heads

Size : DN25, DN28, DN32 with 200 PSI
Material Stainless 304 class

## Main Item2

### Fire protection Valve

[YONGWON(R. Korea) - High pressure Valve / UL listed & FM approval]

1. Alarm Check Valve(175 PSI)*
2. Butterfly Valve(200 PSI)*
3. Gate Valve(200 & 300 PSI)*
4. Swing Check Valve(300 PSI)*
5. OS&Y Valve(200 & 300 PSI)*
6. NRS Valve(200 & 300 PSI)*
7. Outdoor Hydrant

* Flange & Grooved type

## Main Item3

### Grooved fittings

[FLEXFIX - Grooved fittings / UL listed & FM Approval ]

1. Rigid Coupling
2. Flexible Coupling
3. Mechanical Tee
4. All fittings

Size : DN 25 to DN 600 with 300 PSI

## Major Customers

Company related to display industry

## Strengths

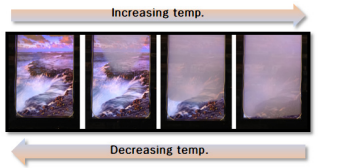
KNW Co., Ltd is a company specialized in manufacturing high-tech materials for display industry and materials of automobile component.
KNW pursues consistent researches and developments as well as changes, aiming to provide customers with the best products and services for customer satisfaction from advanced production and strict quality management.

## Products

- Coating materials & films for display industry
  : Silicone blanket, Functional/Adhesive coating, etc.
- Automobile components
  : Lami Sponge, Inorganic Tape, Felt for car seat, etc.

## Main Item1

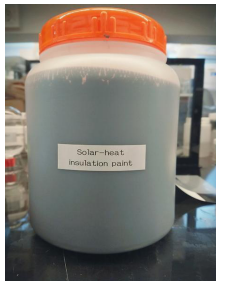
### Thermosensitive smart window & coating solution



By using thermo-sensitive coating in window, it shows outstanding reversible transmission between the higher and the lower temperature than phase change temperature (PCT) for sunlight. So it can be efficient for decreasing energy consumption.

## Main Item2

### Solar reflective heat-insulation paint



- Solar heat-insulation paint shows outstanding heat-insulation properties for IR range of solar.
- the paint helps reduce energy consumption for both heating and air-cooling systems.
- Regardless of dark color (gray), this paint shows excellent heat-insulation for solar heat (Infrared range).

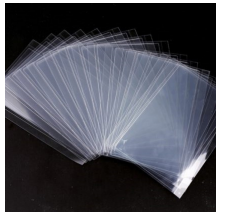
## Main Item3

### Privacy Screen Protector film

- Privacy Screen Protector film will help you keep your private messages private making sure that your screen is for your eyes only.
- The design is simple, allowing only the person holding the monitor to see the screen.
- Protector film is 0.22mm thick and shatter-resistant.

## Main Item4

### Optically Clear Adhesive



- This is silicone based optical bonding sheet that is glued between the cover glass and display to eliminate the air gap so that it can provide perfect contrast and readability.
- Better visibility under the direct sunlight provides improved contract in brightness.
- Thickness of adhesive layer : 10 ~ 1,500μm

- Military, Ariport, Power station

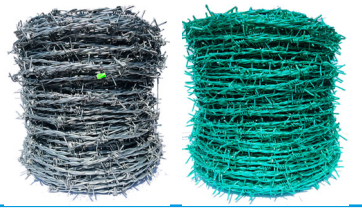
## Strengths

Various material available(zinc wire, PVC coated wire, Titanium wire, Powder coating color), High T/S Wire, High zinc quantity. Customized size and weight

## Products

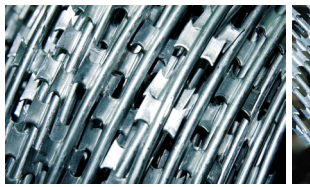
Straded Barbed Wire, Concertina Babed Tape, Razor Barbed Taep, Concertina Barbed Wire, Military Fence, Mesh Fence, Galvanized Wire, Wire Mesh, Chain Link Fence, Hexagonal Wire Mesh

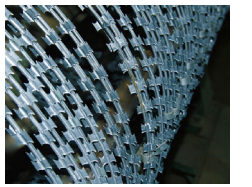
## Main Item1



Stranded Barbed Wire / Galvanized wire
- STS304, PVC coating wire
- Spacing Barbeds : 100±13mm
- Line Wire Diameter : 1.6 ~ 2.6mm
- Barbed Wire Diameter : 1.3 ~ 2.0mm
- PVC coating Diameter : 1.6 after 2.3mm

## Main Item2





- Concertina Barbed Tape/Razor Barbed Tape
- Coil diameter : 600/950/1020mm
- No of Spiral turn : 56/70turns
- Galvanized STS304 sheet
- High T/S Steel wire : 2.5/2.6mm
- Barbed Tape thickness : 0.5mm

## Main Item2

- Concertina Barbed Wire
- Coil diameter : 600/950/1020mm
- No of Spiral turn : 56/70turns
- High T/S Steel wire : 2.5/2.6mm
- Barbed wire : 2.0mm

## Main Item3

- Mesh fence
- Heigh : 0.9/1.2/1.5/1.8/2.0M
- Color : Green/White/Black/ Hammer tone color and customized color available
- Post type : Ground / Anchor and Round/Retangular/Customized shape available

## Main Item4

- Non ClimbMesh fence
- Heigh : 0.9/1.2/1.5/1.8/2.0M
- Color : Green/White/Black/ Hammer tone color and customized color available
- Mesh diameter : 1.6~4.2mm

## Strengths

7 located branches all over the world
Supplying products more than 50 countries
29 years of produciton know-how
10 years warranty for U.V. stabilization
100% all products made in KOREA

## Products

100% HDPE knitted fabric with U.V. stabilization for using mainly car parks shade structure

## Main Item1

Non-waterproofed shade fabric
Raw Material : 100% U.V. stabilized HDPE
Pattern : Warp Knitted Lock Stitch Mono+Tapefilament
Max. Width : 4mtr (13')
Standard Roll Size : 3mtr x 40/50mtr
Color : any color available as per buyer's request
Mold and mildew trouble-free
Heat set treatment to increase stability and consistency
FR (Flame Retardant) treatment available
Use for, Structure membrane such as place for car parks, playground, swimming pool etc.

## Main Item2

Waterproof coated shade fabric
New development product to prevent UV rays as well as rain.
Raw Material : 100% U.V. stabilized HDPE + LDPE coated
Pattern : Warp Knitted Lock Stitch Mono+Tapefilament
Max. Width : 3mtr (9.8')
Standard Roll Size : 2.0/2.4/2.7/3.0mtr x 40/50mtr
Color : any color available as per buyer's request

Sandwich panel production lines
Roll forming equipment

## Main Item1

### Polyurethane sandwich panel production line

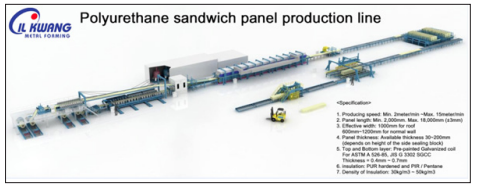
〈Specification〉
1. Producing speed : Min. 2meter/min ~Max. 15meter/min
2. Length of Double belt conveyor : 20~40meter
3. Factory Electricity : 380V x 50Hz x 3Ph (User's choice available)
4. Controlling Electricity : A.C. 220V (User's Choice Available)
5. Factory's Area : 130~150(Length) x 30m(Width) x 6m(Height)
6. Pressure of compressed air : Over 6 bar required
7. Production : 4~5 person

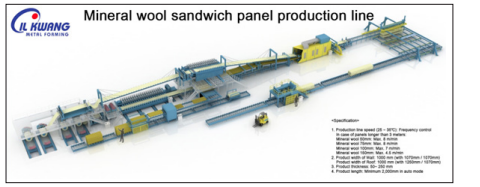
〈The general specification of PU panel produced〉
1. Panel length : Min. 2,000mm in auto mode Max. 18,000mm (±3mm)
2. Effective width : 1000mm for roof 600mm~1200mm for normal wall
3. Panel thickness : Available thickness from 30~200mm (depended upon heights of the side sealing block.)
4. Top and Bottom layer : Pre-painted Galvanized coil For ASTM A 526-85, JIS G 3302 SGCC Thickness = 0.4mm ~ 0.7mm
5. insulation : PUR hardened and PIR / Pentane
6. Density of Insulation : 30kg/m3 ~ 50kg/m3

## Main Item2

### Mineral wool sandwich panel production line

〈Specification〉
Product specification
1. Production line speed (As it is 25 ~ 35℃) : Frequency control In case of longer than 3 meter
   Mineral wool 50mm : Max. 8 m/min
   Mineral wool 75mm : Max. 8 m/min
   Mineral wool 100mm : Max. 7 m/min
   Mineral wool 150mm : Max. 4.5 m/min
   EPS 50mm : Max. 10 m/min
   EPS 75mm : Max. 10 m/min
   EPS 100mm : Max. 10 m/min
   EPS 150mm : Max. 7 m/min
2. Product width of Wall : 1000 mm (with 1070mm / 1070mm)
   Product width of Roof : 1000 mm (with 1250mm / 1070mm)
3. Product thickness : 50~ 250 mm
4. Product length : Minimum 2,000mm in auto mode
5. Electric power source Commercial voltage : According to customer's specification Total power : 200Kw Control Voltage : User's Option (ex : D.C24V, D.C12V, A.C220V···.)





## Main Item3

### EPS sandwich panel production line

〈Specification〉
Product Specification
1. Producing Speed : Max. 7~10 m/min
: Max. 7~10 m/min
: The speed can be changed as below conditions.
: a. the type of glue
: b. temperature of mixing area
: c. thickness panel, length.
Width : 1000mm
Thickness : 50 ~ 200mm
2. Electric power source
Commercial voltage : According to customer's specification
Total power : 130Kw
3. Raw Material : Pre-painted galvanized steel sheet. ASTM A 526-85 / JIS G 3302 SGCC or other same class of soft material.
Coil Thickness : 0.4 ~ 0.7mm
E.P.S Size : For main board (It is just our standard, changeable by buyer)
: (L) 3600 meter×(W) 500m×(T) 50~200mm For roof pad
: (L) 1500 meter×(W) 600m×(T) mm(same as roof height)

## Company Profile

The doors we produce are doors that are installed for use as use-related regulations to prevent further spread of fire in the building and to minimize damage caused by it.
We have achieved more than 1 hour of non-insulation performance at a temperature of 1000℃.
All the products made in our factory are based on **fireproof steel door**.
We comply with international standards.
We hope to meet a partner in the Middle East.

## Major Customers

Samsung. Hyundai, Dewoo, GS, HDC, POSCO, SK, Taeyoung

## To whom to supply

Construction Companies & Importers & Distributors

## Strengths

JM E&C is proud of its best quality.
We have been recognized for the best quality at the Korean Expressway Cooperation and Korean Railway Network Authority known for very strict quality standard, and Global construction companies based on Korea. We will always try to our best to satisfy your needs with latest product line, which is highlighted in low-carbon green growth due to new produce methods.

## Products

1. New Excellent 1000/1000A/1000T: Waterproofing Membranes are used to provide waterproofing under ceramic tiles on wet room's floors and walls after installation.
2. New Excellent 2000A/2000B: Waterproofing Membranes for Roof Top based on Non-expose types and optional expose types.
3. New Excellent 3000A: Waterproofing Membrane for Basement and Foundation construction which using HDPE sheet, Adhesive and Silica
4. New Excellent 4000A: Waterproofing Membrane for walls including from large to small scale constructions.
5. New Excellent 5000/5001/5002: Waterproofing Membranes for mainly Tunneling, 5000 is for Multi-Layer sheet, 5001 EVA sheet & 5002 VLDPE sheet.

## Main Item1

**JM Elite Multi-layer Sheet**

It is composed of different polyolefin based materials more than 3 kinds (3 layers). Compound incorporated in each layer gives high functionality and thinner product by 20% or above than previous products reduces the discharge of carbon markedly as eco-friendly product. It has been also developed by new concept and new method with a great workability, tensile strength, tearing resistance, elongation and welding ability. (Uses: Road tunnel, Railway tunnel, common duct, Electric tunnel, Underground structure, waterproofing works for water barrier, etc.)

## Main Item2

**JM Elite New Excellent Sheet**

Optional exposed and non-exposed UV membrane by using Urethane liquid, it is formed of polymer synthetic resin multi-layer and manufactured in the integral type which highly viscous and adhesive agent with great bonding power are integrated on the top of concrete structure and provides stable waterproofing layer. It is low carbon eco-friendly new conceptual product which has very great impact resistance, wear resistance, salt water resistance, responsiveness to behavior, water resistance and chemical resistance. (Uses: Waterproofing for the top of Parking lot, swimming pool, outer wall, top roof, underground, Subway, Underground roadway, Electric tunnel, Cable tunnel, Underground structure, Powder magazine, hangar, etc.)

## To whom to supply

NewTarps&SNY.,Ltd is a reliable net company providing PE Scaffolding Net(Debris Net), PE Mesh and Shade Net for use primarily in the industrial, construction site and agriculture etc. We placed highly-skilled engineers having more than at least 20 years experience to each production session and could be successful to gain the stable production line.

## Strengths

*Automated System on extruder
- Record all order history, easy to set up for re-peat order
- Stable material mixing ratio, color and qualification
*Automated System on weaving machines
- Arrangement one staff per one machine for controlling system
- Prevention for any defect on the fabric
- Reduce the production loss quantity
*Heating System on weaving machines
- Improve the product quality
- Prevention the shrink of fabric

## Products

PE scaffolding Net (Debris Net)
PE Shade Net
PE Fence Net

## Main Item1

### PE Scaffolding Net (Debris Net)

PE Scaffolding Net(Debris Net) and PE Mesh are used on construction sites to aid in worker safety. It can protect the people and property from hurt or injury may caused by the falling pieces from higher places of the buildings.

## Main Item2

### PE Shade Net

PE Shade Net is made of High Density Polyethylene with anti-ultraviolet additive and color master batch, which is light, strong and anti-aging covering fabric for agriculture applications. Our PE Shade Net is economical and easy to operate and it is useful to covering fabric in winter to protect vegetable growing.

## Main Item3

### PE Fence Net

It is made of 100% HDPE Monofilament and we can produce it from 105gsm to 120gsm weight with any color. It is mainly used in construction site and FR treatment is available

## To whom to supply

HOUSE RESIDENTS, RESTAURANT, COMPUTER ROOM, AIR CONDITIONER SELLER

## Strengths

EPARAM has come up with the goal of creating more convenient products and more efficient products.
With the development of next-generation air conditioner with no outdoor unit, it has created innovative
winds and has been loved by many customers and well-known as a green energy company.
It is the first and the best in the world, "Integrated Watercon with no outdoor unit and one-touch detachable portable air conditioner

## Main Item1

### Portable Air conditioner(PA-M07C)

- The first one-touch detachable air conditioner.
- Efficient cooling for small spaces
- Easy to move and install
- Choose the right product for your environment and location
- Window-type, camping type, ultra-small type
- Specially designed products to control indoor cooling
- Various condensate drainage system

## Main Item2

### Water-cooled Air conditioner(PW-F085CP)

- Air conditioner
- There is no outdoor unit for the air conditioner.
- Air conditioning performance 20~30% better than existing products.
- Without an outdoor unit, the air conditioner cools down hot condensation through heat exchange.
- The unit can recycle 45'C water discharged during cooling activity. Warm water can be recycled by connecting the unit with a dishwasher, sauna, bathtub, heating system, etc.
- It reduces at least 20% of your air conditioning-related electricity use when compared to air-cooling air conditioners, and is easy to install and move.

## Main Item3

### Industrial Air conditioner(PA-SC6000A)

- Deliver a strong, cool wind at the right place
- Allows local cooling to the required location according to user's convenience
- Can be installed in various places with various parts.
- Easy and simple display
- Urethane material wheels make it easy to move even in bad environments.

## Strengths

Fanzic is a well-organized manufacturer and exporter which specializes in supplying Fans
& Blowers since 1987. After taking over LG Industrial Division in 1998, we guarantee to satisfy requirements of the customer on the basis of rich experience and technical development in the meantime. As a result, Fanzic has an excellent reputation from our customer and our Fans and Blowers are used in more than 20 countries currently.
Fanzic will do our best to provide top customer service and develop the advanced high quality ventilation products that ensure a comfortable living environment.

## Products

- Centrifugal Fan
- Propeller Fan
- Plastic Fan

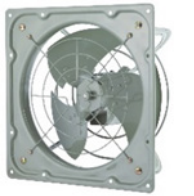
## Main Item1

Centrifugal Fan

- Easy installation.
- Low sound levels.
- Easy to check and repair by removing the motor and the fan.
- Allowable temperature range : -10℃ + 50℃ (It is even operable up to 90% of relative humidity under the room temperature.)

## Main Item2

- Propeller Fan
- Adopted a streamlined blade for low sound lovels.
- Anti corrosive and vibro-isolating properties.
- Suitable for quiet places like factories, warehouses, restaurants etc.
- Assembling all apparatus.



## Main Item3

- Plastic Fan
- Easy to install and clean it.
- Designed to be quiet.
- Large air flow and low sound level.
- Low electric consumption.
- Applied energy-saving motors.

## Major Customers

HVAC

## Products

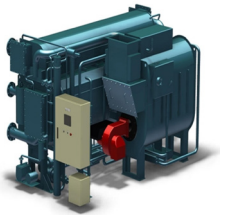
Hot Water Absorption Chiller
Direct Fired Absorption Chiller
Screw Chiller

## Main Item1

Hot Water Absorption Chiller

- This Hot water Absorption Chiller gives you the optimization and efficiency on performance and saving energy. This product has MICOM control panel developed by us for user's convenience.
- The chiller operates with 95 degree of Hot water and let it out 55 degree that makes delta t 40 degree, actual use. In other words, you can save the energy and cost on the greatest quality out of all hot water absorption chiller which already proved in Korean chiller market.

## Main Item2



Direct Fired Absorption Chiller
Currently registered this product on Public Procurement Services that implies the chiller is the excellent on its performance.
Thinking of user's convenience is our motivation to develop the better chiller and cost efficient by partial load. This is because customer's satisfaction is ourpriority.

## Main Item3

Screw Chiller

- Two types of screw chillers we have : air cooled / water cooled.
- Various types of refrigerants such as R-22, R-507 ,R-134a and other etc. Its performance is superior on competitive as the design of the chiller is closely compacted together based on the condition of the place for the first time.

## Major Customers

Haatz, Assaggaff Trading East, Al-rajhi Factory for Sink

## Strengths

We are the only company in Korea that has both sink and drain manufacturing facilities.
Based on these facilities, we provide more economical and quality products in an advantageous price compared to our competitors.
Our products are recognized overseas and more than 60 percent of our sales are export records.
Since establishment, it has maintained export relations with Saudi Arabian companies for about seven years. Recently, it has expanded its export areas to Turkey, Iraq and Vietnam.

IMPORTER, WHOLESALER, DISTRIBUTOR

## Strengths

Since established in 2000, We, KORINA CO., LTD as a leading supplier of stainless steel sink, have made for creating the best quality of kitchen life style with producing the high quality kitchenware by the newest facilities and advanced technology. We KORINA are trying to do our best to make an advance and ideal kitchen culture based on our craftsmanship and high technologies.
We offer an excellent selection of stainless steel sinks which are durable and feature various functions. Our steel sink resists scratching, staining, and damage from ACID, ALKALI. Sink bowl is larger and deeper than other company's product. Large and deep bowls are available to treat with much water and prevent spraying of water. It can maintain timeless beauty and elegance. Rounded corners are easier to clean and improve draining. Our sink makes customers to have convenience, pleasure and much more opportunity of choice in the kitchen.

## Major Customers

Gas Utility, and companies and agents in the Gas and Water industry

## Strengths

The merits of PE Ball Valve are;

1. The All Plastic Design allows longer lifetime than steel valves.
2. The plastic body is free from the erosion caused by chemical substances in the gas or electrical contact. (LPG, LNG and other gas fuels).
3. Full bore design and smooth PE wall allow the maximum flow capacity for the gas transportation.
4. Integral purge connection for compact, cost effective installation.
5. Massive designed body is resistant to all piping loads both in mechanical and thermal load.
6. Specially compounded seats show excellent elasticity and toughness over the valves' entire life.

## Products

POLYTEC PE Ball Valve also shows good performance in water and chemical application due to :

1. No erosion by chemical and water.
2. Good flow capacity by lower friction coefficient than steel valves.
3. Easy in installation.
4. Wide range of product size ( 20~400 mm, 1/2~16 inch )
5. Longer lifetime than steel valves.
6. Environment-friendly material (Polyethylene is safe for human body)
