1. INTRODUCTION OF COSCENT

COSCENT apply **new technologies** to car diffusers.

We developed peculiar **patented solid cartridge system** which **prevent chemical damage on vehicle**.

And expanded the area of **aluminum die-casting** industry from automobile parts to **sophisticated metal craft**.

For that we made products with one of the primary parts vendors of Hyundai motors, and other expertised companies in Korea as well.

2. INTRODUCTION OF SCENTMONSTER

SCENTMONSTER is the first signature line-up of COSCENT's premium car diffuser .

The collection began with a pure imagination that the essence of human beings does not change. It stimulates the sense of smell with a luxurious fragrance, the sense of vision with a unique product design, and the sense of touch with a cold metal texture.

This will be the wisest choice to express your essence.

4. DESIGN

Design with impact of Skull & Lion representing strength and transformed to add uniqueness and premium with polygon shape.

5. MATERIALS

Body: Aluminum

Solid aluminum alloy has been used to replace typical plastic material which is vulnerable to crack or deformation. It gives inherent luxury and unchanging beauty of metal

Cartridge: PP

Cartridge made of PP that is recognized as safety as a food container, so that scent block containing high purity fragrance is not deformed or, harmful substances are not generated.(BPA Free)

Clip Rail: PPS

Clip rails made of engineering PPS used in aircrafts and car engine. For easy and safe assembly of the body, cartridges and clips.(BPA Free)

6. CARTRIDGE SYSTEM

Solid type cartridge

By adopting a solid type of cartridge, we have been able to **eliminate the dangerous aspects of conventional liquid type**. It is simple to replace, does not get on your hands, and prevent chemical damage on vehicle

Perfect coupling design

Design of Scentmonster with minimal error between the components for **stable use even in vibration when driving**.
