wnjd****'s review

I had never expected results like this.
It is the **best laundry product** for stubborn stains.
Before using allook-yak, I was going to throw away
my beloved suit jacket. Definitely recommend it!

cosu****'s review

Allook-yak performed above my expectation.
My shoes were stained from plums. Now, the stain
has vanished. My shoes are reborn!

spec****'s review

Even though I saw many reviews, I never thought it
would actually work. I just wanted to try the product.
So, I had no expectations.
However...
I was really surprised and it's really cheap!
Definitely one of my favorite go to items!

Remove all spots
from all kind of fibers easily.

Youth Laundry, **Allook-yak**

Allook-yak

Six advantages

perfect

Existing stain remover

VS

Allook-yak

Limited	Materials	All
Limited	Color	All
Limited	Stain	All
Depends on products	Human stability	safe
OEM	Manufacturing	In-house development / Own production

How to use Allook-yak

01

FIRST

Spray Allook-yak on the spot.

- Use when the spot is soaked into fiber.
- Spray at least 4 to 5 times.
- It's better to get close to the spot.

02

SECOND

Please wait a moment.

- It needs time to penetrate the spot.
- Wait 1 to 2 minutes.

03

THIRD

Rub the sprayed area.

- It's easier to wipe off with a wet tissue, toothbrush, etc.

04

fourth

Do the laundry.

- Allook-yak works wonders with laundry.

* At the time when a piece of clothing or material is stained, be sure to wait a few minutes before applying Allook-yak to the effected area.

Allook-Yak FAQ

Q. Old stains are not removed?

A.

No, it's removable! However, it is difficult to confirm that it is 100% clean. The stain consists of oil and pigment.

After separating the oil and the pigment, it penetrates the oil film and enters into the color dye, and breaks down the coloring, which fades over time.

If you are going to do laundry without 'stain removal process' flecked with water, the remaining stains are embedded deeper into the fibers. When you go through this process several times, 'fiber disfigurement' occurs.

If this happens, it will be a case of 'fiber restoration' rather than 'smudge removal'.

Do not neglect stains; attend to them as soon as possible with 'Allook-yak'.

Q. How do I make old stains softer?

A.

Regarding old stains, spray more generously; 4~5 times. After that, you should rub it with a wet tissue or a towel dampened with warm water.

For best results, immediately wash the clothes (with detergent) after spraying with plenty of Allook-yak!

Q. I stained my clothes and immediately tried cleaning them. It made the stains bigger.

A.

You have to wait until the stains are completely absorbed (at least 10 mins). If you use Allook-yak immediately after the material has been stained, the spray will act on the fibers before the stain has properly attached itself to the fibers.

This spreads the stain, and makes it bigger!

We recommend that you use your Allook-yak after all the stains have penetrated!

Q. The stain is getting bigger.

A.

Stains that are enlarged or that have spread is proof that stains breakdown! How is this so?

Removing stains is not an 'erasing' process (like an eraser to a pencil). Rather, it is a 'disintegrating' process.

Stains that spread usually occurs when the color or grease of the stain (red, chocolate, black) is strong, and the stain is too old, or the size is large.

Do not worry, simply repeat the Allook-yak process;

once again spraying the stain remover, then immediately rinse regularly with laundry detergent, and let it dry in the sunshine.

Q. Performance is not as dramatic as the video?

A.

Unlike existing social media advertising products, our video ad is a basic concept of uncorrected editing.

We use fast-paced editing methods, but all results are never tampered or manipulated with! It can be misunderstood that stains can be removed in a few seconds, because of the speed of our ad. This is not the case.

Please follow how to use Allook-yak slowly! 😊

Q. I want a more dramatic result.

A.

For more dramatic results, we should use stronger ingredients and recipes, ignoring eco-friendly ingredients.

This will have a slightly better result on stain removal, but it can be harmful to the human body.

However, we believe that our process and formular is 'dramatic', which can be used for all fibers and colors, unlike conventional stain removers.

Q. Is it possible to remove any dye transfer?

A.

No, it is difficult.

Stain removal decomposes pigment, such as foreign matter attached to fibers. The dye cannot be removed if it is part of the material's characteristic.

It is possible to see a slight softening effect through via Allook-yak, but it is difficult to erase the dye completely.

Q. Is it possible to use leather such as suede?

A.

No, it is difficult. Leather is not fiber.

We do not recommend it in the first place because there is a possibility of damage even a little leather!

Precautions when using Allook-yak

1 Non-staining chemicals cannot be removed.

- Paint / Permanent marker / Mold / Rust / Manicure

2 Allook-yak is a stain remover.

- You can not mistake it for medicine and eat it.
- If you take it, immediately dispose of it and rinse your mouth and visit the hospital.
- Please keep out of reach of children.
- In case of eye contact, rinse with running water and visit the hospital.

3 Sparying Allook-yak on stains may cause spread.

- This phenomenon may occur when the pigment is strong or stains are poor.
- This is hard to understand. Consider rewriting it or deleting it.
- Spary Allook-yak on stains again, and use washing machine immediately after.

4 Rubbing clothes too hard can damage the fibers.

- After spraying Allook-yak, please apply the appropriate force in the same direction and rub.
- The fabric may be damaged if it is rubbed strongly enough that the fabric is severely pushed.
- You do not have to worry because Allook-yak is neither harmful fabrics nor your skin!

5 Old or special stains are hard to eradicate even in professional laundry.

- In particular, if the fiber is damaged due to staining or storage problems, it may not be effective.

Youth laundry, Allook-yak 50ml

Indication by Law on Registration and Evaluation of Chemical Substances

Product type	General life chemical products (synthetic detergent)
Purpose	For clothing (spray type)

★★★★★

Much better than I expected. I have a lot of cosmetic stains on my bubble jacket, so I was worried about what to do. I tried it on a knit or T-shirt. Next time I'll buy a larger one !

★★★★★

It's useful. I wish there was a larger one or a refillable version.

★★★★★

I think it's the first social media advertising product that works like as it does in the advertisement. I hope they will release a larger model. Next time I'll buy one for a friend as a gift.

We made it!
